AS-3 TUNGSTEN GRINDER

Electrode diameter: 1.6/2.4/3.2mm or 1.0/1.6/2.4mm

Grinding Angle: 22.5 deg and 30 deg

Voltage: 240v

The AS series hand-held tungsten grinder, with its lightweight body, allows for quick transportation to any jobsite. With grind and cut functions, operators don't need any other tool for tungsten preparation.

Different angle grinding capabilities ensure superior TIG & Orbital TIG weld quality, reliable arc starting and good weld penetration.

A robust pulse industrial-grade motor extends grinder life and runs smoothly to provide accurate, consistent tungsten preparation.

High-quality, dual-sided, diamond-coated grinding wheels provide reliable, long-term performance to minimize costs and downtime for replacement.
