

GFITool PB PORTABLE PIPE BEVELLING MACHINES

The PB type ID locking pipe beveling machine is designed for portable use in pipe weld prep operations. It can be used efficiently by a single operator and is mounted inside the pipe. Self-centering expandable mandrels provide quick and proper alignment to a pipe or a tube prior to machining operations.

- Ideal and reliable solution to precisely square bevel for all types of metal pipes/tubes.
- More powerful to cut and bevel with higher efficiency.
- It can bevel, face off, chamfering and counter bore, making all these weld prep operations quick and simple.
- Burr-free and smooth surface after cutting and beveling
- Easy to operate and carry.
- It can be operated with a high-quality powerful pneumatic motor or a high-torque electric power drive.
